

**REDUCED  
LEAD TIMES.  
PRECISE,  
CLEAN CUTS.**

## Hoffman Certified Modification Center

Steiner offers an extensive local inventory of Hoffman enclosures that can be customized to meet your specific requirements and delivered precisely when you need them. This allows you to maintain your focus on your operations and your customers' needs. Say goodbye to the time-consuming manual modifications of enclosures, and welcome reduced lead times and labor costs with Steiner's Hoffman Certified

Modification Center. We eliminate manual measuring, drilling, and cutting, using our state-of-the-art CNC technology to deliver enclosures and subpanels to your facility or job site. Whether you require one-off panels or complex modifications to essential enclosures or subpanels, we can automate this labor-intensive process from our extensive local inventory.

### Benefits

- Precise, clean holes and cutouts every time
- Cuts materials including mild steel, stainless steel, aluminum, copper, PVC, and glass-reinforced plastic
- Any cutout, shape and size
- Ventilation options
- Easy ordering by supplying existing design files
- Reduced lead time and in-house labor costs
- 100+ standard paint finish options

### Quick-Ship Enclosures and Thermal Management

The new quick-ship program, HOFFMAN on Demand, is designed to provide you with faster access to a full range of industry-leading enclosure and thermal management solutions from nVent HOFFMAN. As an authorized HOFFMAN on Demand distributor, Steiner maintains ready-to-ship stock, tailored to local needs, covering a core set of products that serve virtually every application.
