

Power Quality Products

Be prepared! When milliseconds count, you can't lose power!

Our Steiner team brings decades of experience in power quality products, including UPS systems and power management solutions, offering tailored assistance to meet your specific needs effectively.

Your power infrastructure, comprising generators, automatic transfer switches, UPS systems, surge protection, and power monitoring systems, must promptly respond to deviations from specifications. Whether for

emergency systems, sensitive controls, IT networks, or other applications, we ensure successful project outcomes.

Contact our team for expert guidance. Reach out to a sales representative at **1-800-STEINER** (783-4637), or simply [CLICK HERE](#) to request more information through our convenient form.

POWER QUALITY PRODUCTS

Uninterruptible Power Supply - UPS

Steiner offers a wide range of single and three-phase UPS systems designed for continuous availability applications. These systems, ranging from 10 kVA to 4000 kVA in single, multi-module, and redundant configurations, are ultra-reliable and cater to various needs.

- **Off-Line UPS:** Passes utility power straight through to the protected load with a 4-8 ms break in power when transferring to battery backup.

- **Line Interactive UPS:** Offers power conditioning with a 2-6 ms break in power during battery backup.
- **On-Line (Double Conversion) UPS:** Provides continuous, high-quality AC power to equipment with no break during battery backup. It safeguards equipment from a wide range of power disturbances including blackouts, brownouts, sags, surges, or noise interference.

Automatic Transfer Switches - ATS

Offering one of the most comprehensive lines in the industry, ASCO® and Russelectric ATS models provide dependable solutions for a wide range of applications. These transfer switches are designed to seamlessly complement any power system, ensuring a constant source of electricity for critical environments such as data centers, communications systems, airports, hospitals, farms, and more.

ASCO® and Russelectric supply UL 1008-listed power switching mechanisms, guaranteeing safe and rapid transfer to an emergency source in under 1/6 second. Our transfer switches range from 30 amps to 4000 amps, available in manual, non-automatic, automatic, and bypass isolation configurations.

Power Monitoring & Control Systems

PowerLogic, by Schneider Electric, offers the world's most advanced range of monitoring software and meters for efficient energy usage and cost management.

Key Benefits:

- Maximize the use of existing energy assets.
- Increase efficiency and reduce emissions.
- Improve safety and prevent costly downtime.
- Identify hidden power problems to prolong equipment life.

Please contact your Steiner Power Quality Specialist at **1-800-STEINER (783-4637)** for a consultation to address excessive downtime, system failures, and frequent repairs.

Steiner Electric – Who we are Steiner is a full-line electrical and metalworking distributor that serves the commercial construction, industrial and OEM markets in the greater Chicago area. We pride ourselves on having in-house experts and access to our vendor’s experts to help with innovation, process improvement and machine performance.

We have developed extensive digital tools that help our customers to easily connect with our personnel and products in order to get information and deliveries quickly and easily. Our customer portal is designed to help get answers and tasks completed quickly. We believe that our digital experience is just as important as interacting with us in-person. Our delivery solutions are focused on improving a customer’s efficiency when receiving material. We have solutions that deliver at specific times or provide material based on the needs of the project.

Commercial Construction

Servicing the electrical contractors and building maintenance personnel.

Industrial End User

Servicing steel mills, metal shaping and forming, manufacturing plants, food processing, industrial and commercial warehousing, data-centers.

OEM

Helping machine builders innovate and automate packaging, material handling, manufacturing and assembly.

The Power of Expertise

Access local and global product and application experts to innovate and improve business outcomes.

The Power To Connect

Access information on products, order status, sales personnel and more in an instant to meet the speed of business.

The Power to Deliver

Your material and solutions provided in a way that improves your efficiency.
