

EdgeConnect™ Technology - Install devices more securely, significantly faster.

Hubbell's innovative, patented EdgeConnect technology makes for the fastest terminating devices. Strong levered steel springs eliminate screws and keep wires secure. All industrial and commercial wiring device categories benefit with EdgeConnect technology for increased performance and productivity.

The Steiner electrical application team can help you select the right product based on your requirements for amperage, volts, wattage, number of poles, and wire size.

What is EdgeConnect technology?

Strong levered steel springs inside the device apply pressure continuously. They eliminate screws and keep wires secure for a reliable connection, even in demanding environments.

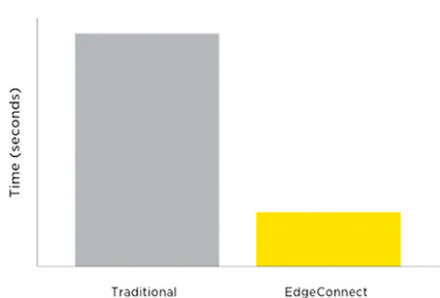

Why EdgeConnect devices are better?

Installers get more done in less time. Terminations are user ready, simply insert the wire and press the plunger down. No torquing, no tools for a fool-proof termination. It keeps wires secure but unwires easily. And no exposed screw terminals mean enhanced safety!

[Shop EdgeConnect Devices](#)

Get done faster! As quick as 11 seconds per termination. Color-coded plungers eliminate confusion.

Instead of loosening, EdgeConnect terminations hold wires tighter when subjected to vibration and temperature cycling.

Compared to UL wire retention requirements, EdgeConnect terminations offer superior strength over time.

Save with any product type

All industrial and commercial wiring device categories benefit with EdgeConnect technology for increased performance and productivity. Find out more below.

Twist Lock

Twist-Lock® devices with EdgeConnect technology deliver rugged performance in any industrial setting subject to vibration.

Straight Blade

Straight blade devices with EdgeConnect technology transform industrial or commercial installation with productivity gains.

Switches

Heavy duty switches with EdgeConnect technology add “fastest installing” benefit to the safest and most reliable designs.
