

Hubbell System One Floor Boxes

Future-proof your commercial space with floorboxes easier to install and use.

In today's commercial applications, power delivery necessitates flexibility alongside more intelligent communication solutions. Hubbell's floorbox solutions revolutionize the installation, management, and utilization of power, data, and AV in construction projects. Their floorbox designs streamline installation processes, offering increased capacity for feed-thru, wiring, and devices. Moreover, they facilitate future expansion or alterations without the need to disrupt concrete structures. Round covers designed for recessed applications ensure adjustability post-concrete pour, eliminating the possibility

of installing a crooked cover. Hubbell stands apart in the market by providing unparalleled dynamic flexibility within their product lines. The choice between recessed or furniture-feed configurations can be made during trimout. Alternatively, users can opt for recessed boxes and fire-rated poke-throughs, both offering the same capacity and cover options. All Hubbell products maintain the quality and reliability trusted by builders, installers, and users alike.
