

FieldSET™ Programmable LED Drivers

With a simple but full range of driver models and an easy-to-use programming tool, FieldSET LED Drivers are a versatile solution for servicing almost any LED fixture in the field.

Faster, Easier Service Opportunities: Easily service existing fixtures by replacing failed driver components – eliminating the cost and time incurred with replacing the entire luminaire.

Linear, Compact, and Industrial Solutions: FieldSET field-programmable drivers offer replacement LED drivers for almost any indoor and outdoor fixture type.

Replace 150+ drivers with only a few SKUs: FieldSET drivers can be programmed to match dimming and current levels, enabling contractors to efficiently serve customers with a simple yet versatile selection of stocked solutions.

Easy Handheld, Push-Button Programming: The FieldSET LED Driver Programming Tool makes replacement easy. With just a few pushes of a button, your replacement LED driver can be programmed and installed without multiple trips up a ladder!
